

Installing TestNG Plugin in Eclipse

Java Version: **1.8.x**

Eclipse Version: **2020-12 (4.18) & lower versions supporting TestNG**

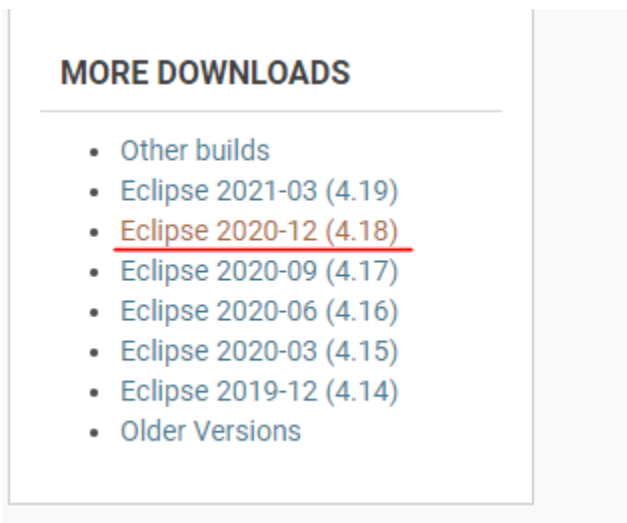

TestNG Version: **7.2.0 latest (or lower versions)**

Step1) Download Java8 and install it (If not done so far)

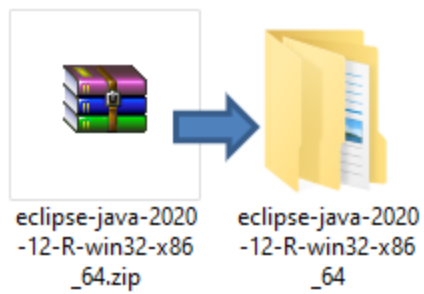

Step2) Download Eclipse and install on Windows.

You can see Eclipse Downloads (Zip File) in below link.

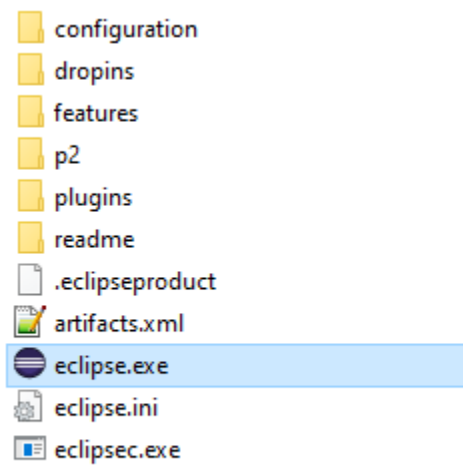

<https://www.eclipse.org/downloads/packages/>

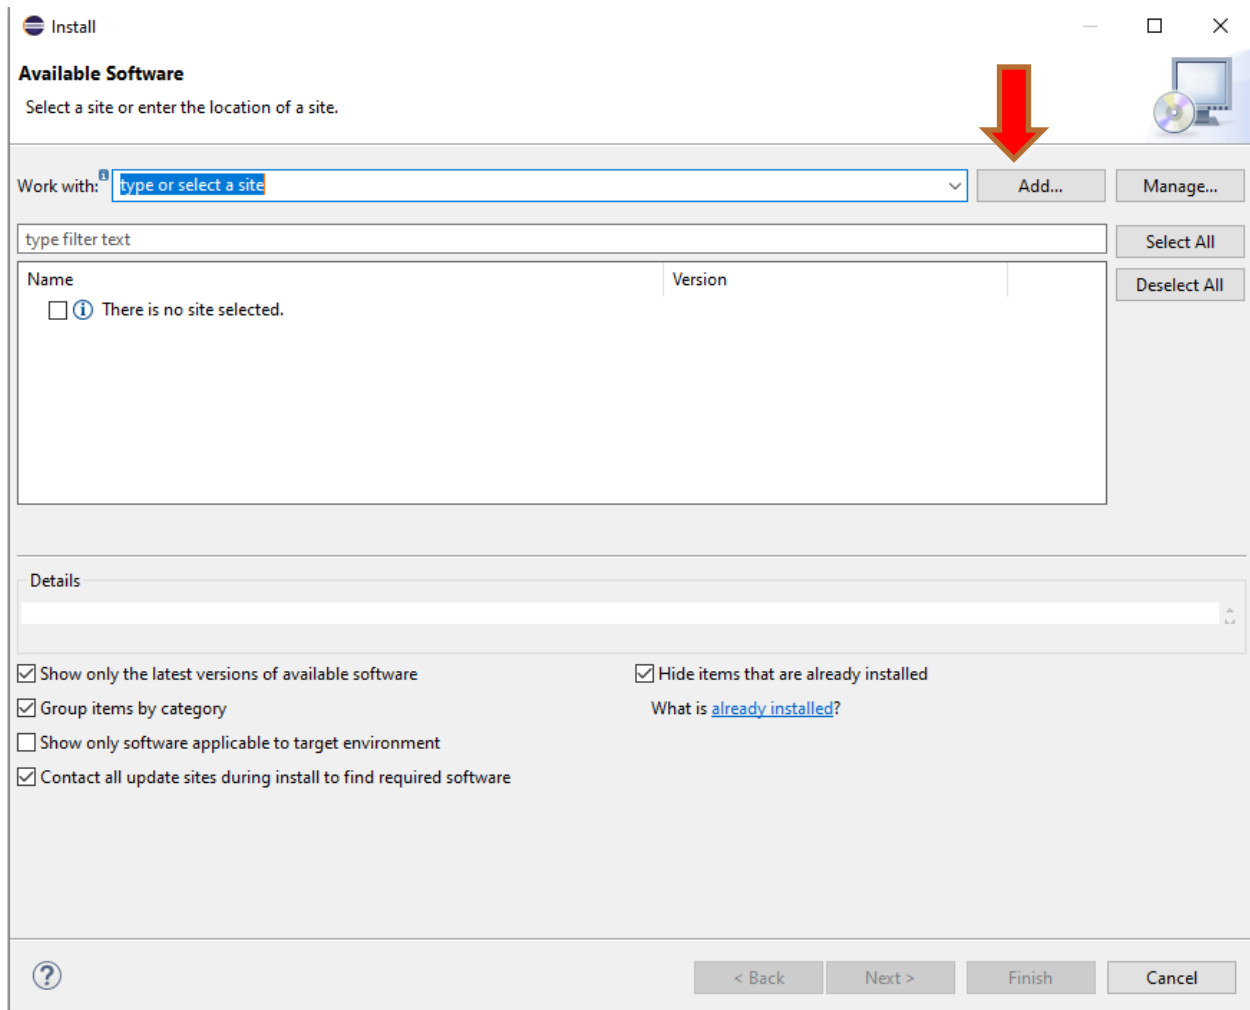

Step3) Once you Download Zip File, Extract Zip File and you can see Eclipse files as below.

Step4) Launch Eclipse by clicking on eclipse.exe

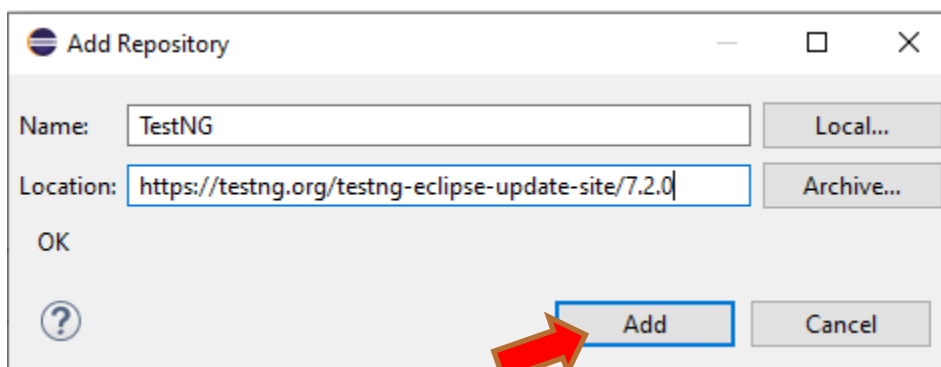

Step5) Once Eclipse is Launched, Go to *Help* → *Install New Software*

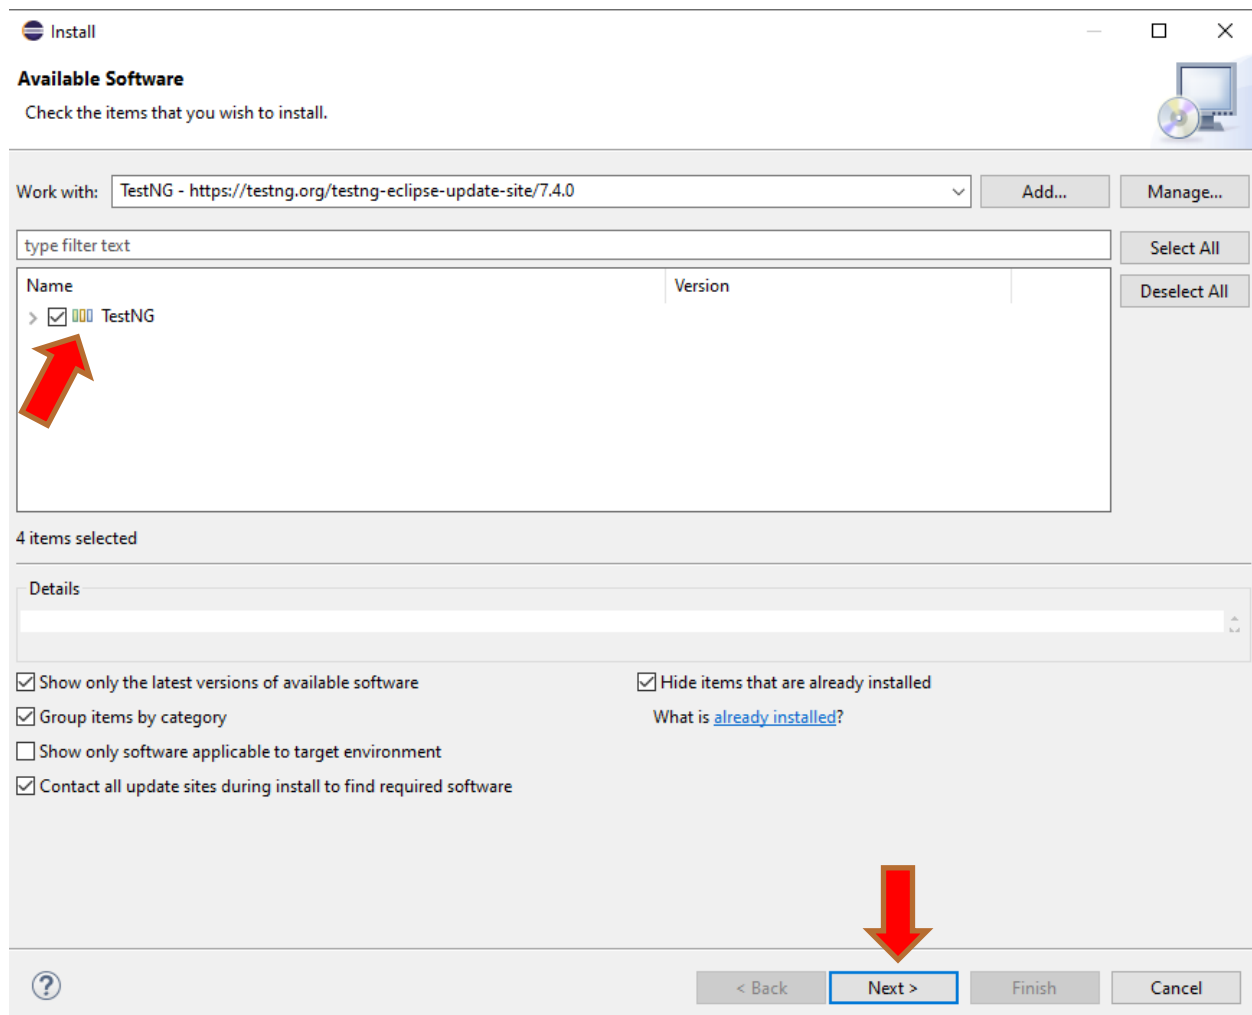

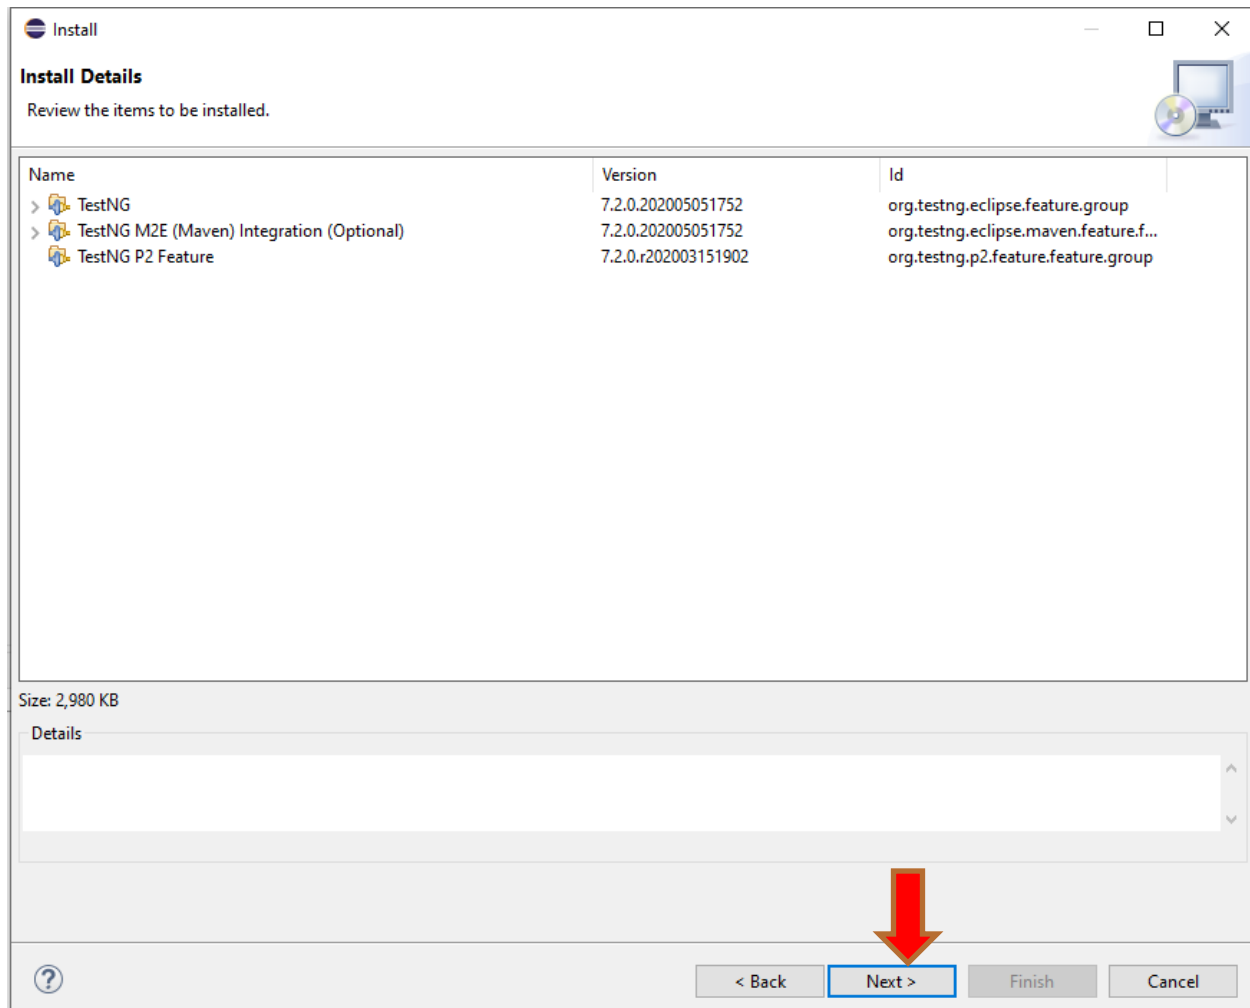

Step6) Click on Add button and provide Name & Location details.

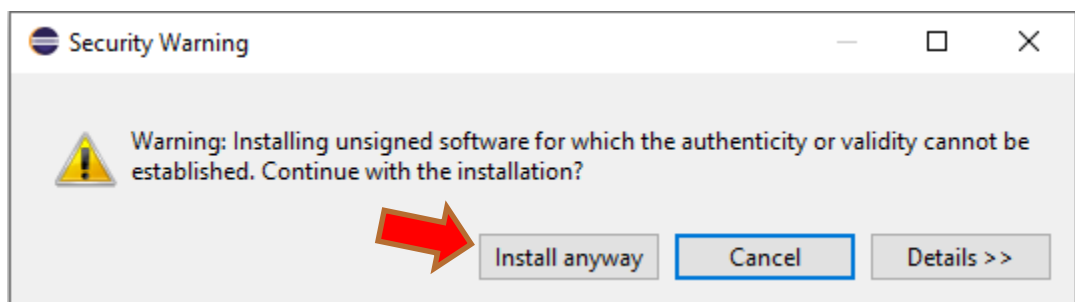

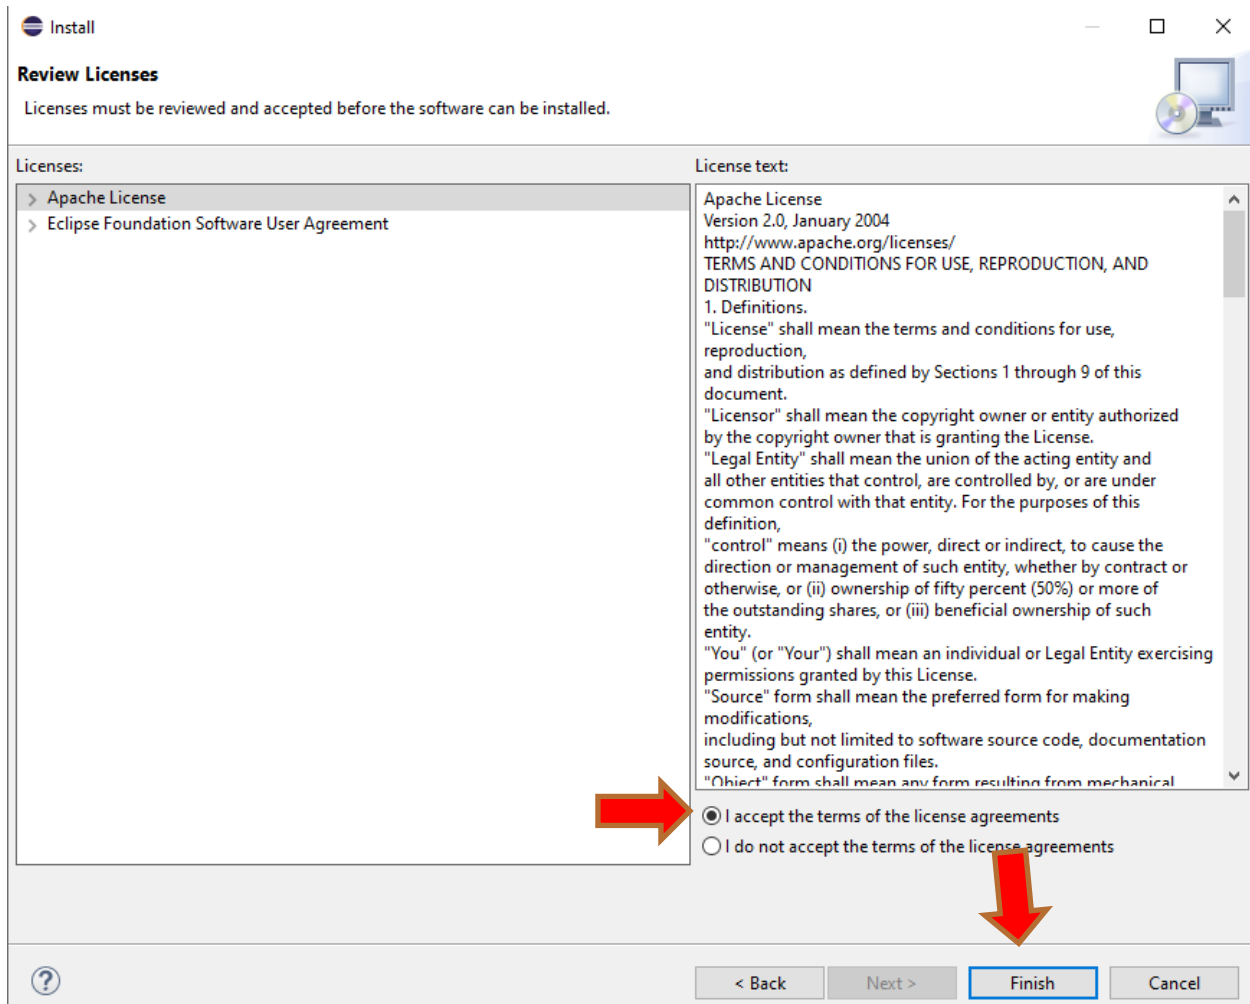

Link: <https://testng.org/testng-eclipse-update-site/7.2.0>

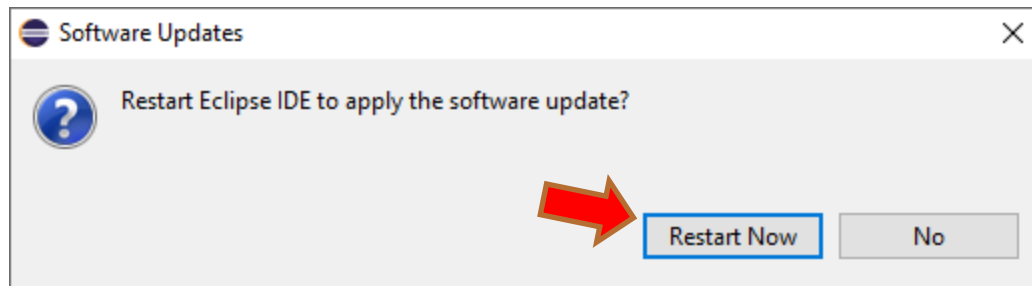

Step7) Select TestNG checkbox then follow the below screens.

Step8) Eclipse will be restarted. After that go to *Window Menu* → *Preferences*

You can see TestNG option in the list. (Means **Installation successful).**
